

Special Issue

Electrochemical Machining: Machines, Processes, Electrodes, Power Supplies, and Their Systematic Integration

Message from the Guest Editors

Electrochemical machining (ECM) is becoming increasingly important as the enabling technology for manufacturing difficult-to-machine materials, particularly in complex geometries at the industrial scale. ECM technology is a timely and fast-moving topic area, particularly applied to medical engineering, aeronautic and aerospace engineering, precision engineering, etc., as it is not limited by the hardness and toughness of metal materials to be machined. Furthermore, it can overcome and go far beyond the conventional limitations by combining new technology, new scientific understanding, new modelling and analysis tools, and advanced algorithms and multidisciplinary engineering capabilities. This Special Issue is indeed an attempt to collate the recent research and development in the field and fulfil the new and big goals in the topic area.

About the Journal

Message from the Editor-in-Chief

Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Editor-in-Chief

Prof. Dr. Antonio J. Marques Cardoso
CISE–Electromechatronic Systems Research Centre, University of Beira Interior, Calçada Fonte do Lameiro, P-6201-001 Covilhã, Portugal

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Mechanical) / CiteScore - Q1 (Control and Optimization)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
