Advances in Medical and Rehabilitation Robots

Message from the Guest Editors

With the aging of the global population and the increase in the number of patients with chronic diseases and disabilities, traditional medical treatment and rehabilitation methods are facing challenges, such as insufficient resources and inefficiency. By combining artificial intelligence, robotics, and precision medicine, medical and rehabilitation robots can provide efficient and accurate solutions for surgery, diagnosis, rehabilitation, and other fields. This Special Issue aims to explore recent advances and technologies in the field of medical and rehabilitation robots, providing doctors and academics with new solutions and perspectives on medical problems.

About the Journal

Message from the Editor-in-Chief

Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided. There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Editor-in-Chief

Prof. Dr. Antonio J. Marques Cardoso
CISE - Electromechatronic Systems Research Centre, University of
Beira Interior, Calçada Fonte do Lameiro, P-6201-001 Covilhã, Portugal

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Mechanical) / CiteScore - Q1
(Control and Optimization)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
