

Special Issue

Flexibility and Efficiency in Reconfigurable Manufacturing Systems

Message from the Guest Editors

We invite researchers, academics, and practitioners from around the globe to contribute their recent findings, innovations, and insights to this Special Issue. Whether your work explores novel reconfiguration strategies, optimization algorithms, simulation techniques, artificial intelligence tools, case studies, or real-world applications, we welcome diverse perspectives and contributions that advance the state of the art in flexibility and efficiency within RMSs. This Special Issue aims to present an exceptional platform for researchers to showcase their work, collaborate with peers, and make a meaningful impact in the domain of reconfigurable manufacturing systems. We look forward to receiving your submissions and to collectively advancing the frontiers of knowledge in this exciting and transformative field.

Guest Editors

Dr. Ismail M. Ali

School of Systems and Computing, University of New South Wales, Canberra, ACT 2610, Australia

Dr. Ripon K. Chakraborty

About the Journal

Message from the Editor-in-Chief

Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided. There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Editor-in-Chief

Prof. Dr. Antonio J. Marques Cardoso
CISE - Electromechatronic Systems Research Centre, University of
Beira Interior, Calçada Fonte do Lameiro, P-6201-001 Covilhã, Portugal

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Mechanical) / CiteScore - Q1
(Control and Optimization)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
