Editorial Board Members' Collection Series: Additive Manufacturing

Message from the Guest Editors

We are pleased to announce this Collection titled “Editorial Board Members’ Collection Series: Additive Manufacturing”, which will collect papers invited by the Editorial Board Members. Additive manufacturing technologies are rapidly changing manufacturing industrial fields in terms of how products are designed and manufactured. They allow for the creation of complex designs with less material wastage when compared to parts that require machining, as well as allowing for the creation of lighter structures. The aim of this Collection is to provide a venue for networking and communication between *Machines* and scholars in the field of additive manufacturing. All papers will be fully open access upon publication after peer review.

Guest Editors

Dr. Gianni Campatelli

Department of Mechanical Engineering and Industrial Technologies,
University of Firenze, Via Santa Marta, 3, 50139 Firenze, Italy

Prof. Dr. Ibrahim Tansel

Department of Mechanical and Materials Engineering, Florida
International University, Miami, FL 33199, USA

Deadline for manuscript submissions

closed (30 November 2023)

About the Journal

Message from the Editor-in-Chief

Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided. There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Editor-in-Chief

Prof. Dr. Antonio J. Marques Cardoso
CISE - Electromechatronic Systems Research Centre, University of
Beira Interior, Calçada Fonte do Lameiro, P-6201-001 Covilhã, Portugal

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Mechanical) / CiteScore - Q1
(Control and Optimization)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
