

Special Issue

Industrial Informatics and Digital Twin

Message from the Guest Editors

This Special Issue solicits articles relating to the automation area for digital twins, and concentrates on digital twin models, digital twin informatics, and digital twin behavior in automatic systems to develop research on self-decision making, self-adaptation, and automatic evolution of automatic systems. Topics of interest include but are not limited to the following areas:

- **Methodologies for digital twins of automation system**

System architectures for digital twins; Representation and modelling for digital twins.

- **Industrial informatics for digital twins**

Industrial knowledge graph of digital twins; Graph neural networks for industrial knowledge graph; Verification techniques for digital twins.

- **Digital Twin-Driven Approaches for automation system**

Integrating digital twins with existing industrial approaches such as Industry 4.0; Augmented reality and virtual reality; Informatics-based and digital twin-enabled industrial services.

Guest Editors

Prof. Dr. Dan Zhang

Department of Mechanical Engineering, Lassonde School of Engineering, York University, Toronto, ON M3J 1P3, Canada

Prof. Dr. Jinsong Bao

College of Mechanical Engineering, University of Donghua, Shanghai 201620, China

Deadline for manuscript submissions

closed (31 March 2022)

About the Journal

Message from the Editor-in-Chief

Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications.

Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided.

There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Editor-in-Chief

Prof. Dr. Antonio J. Marques Cardoso
CISE–Electromechatronic Systems Research Centre, University of Beira Interior, Calçada Fonte do Lameiro, P-6201-001 Covilhã, Portugal

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Mechanical) / CiteScore - Q1 (Control and Optimization)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
