

## Special Issue

# Mechatronic System for Automatic Control

### Message from the Guest Editors

Mechatronics systems are a part of industrial automated control systems, which are a synergetic combination of electrical parts, electronic units, and precision mechanical parts; microprocessor technology; various energy sources; and electric, hydraulic and pneumatic drives. These units and parts are combined in an intelligent control system, which is the focus of contemporary automated industrial systems. This Special Issue will accept contributions describing innovative research and developments in “Mechatronic Systems for Automatic Control”. The overall objective is to cover a wide range of disciplines, including power engineering, industrial mechatronic systems, and automation and control systems. Emphasis is given to methods and findings aimed at determining the prospects for the development of Smart Industry technologies and the creation of promising technologies for the digital transformation of industries.

### Guest Editors

Dr. Vadim R. Gasiyarov

Mechatronics and Automation Department, South Ural State University, 454080 Chelyabinsk, Russia

Dr. Sergey M. Andreev

Nosov Magnitogorsk State Technical University, 455000 Magnitogorsk, Russia

### Deadline for manuscript submissions

closed (31 January 2021)

## About the Journal

### Message from the Editor-in-Chief

*Machines* is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided. There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

---

### Editor-in-Chief

Prof. Dr. Antonio J. Marques Cardoso  
CISE - Electromechatronic Systems Research Centre, University of  
Beira Interior, Calçada Fonte do Lameiro, P-6201-001 Covilhã, Portugal

---

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Mechanical) / CiteScore - Q1  
(Control and Optimization)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
