

Special Issue

Advancing the Art of Welding: A Spotlight on Advanced Manufacturing Technology

Message from the Guest Editor

Welding, a cornerstone of numerous manufacturing processes, is undergoing a rapid evolution driven by the integration of advanced technologies. This Special Issue, “Advancing the Art of Welding”, showcases cutting-edge innovations in welding techniques, materials, automation, and process control that are revolutionizing modern manufacturing. Recent advancements in laser welding, friction stir welding, and hybrid welding processes have expanded capabilities of joining diverse alloys with unprecedented precision and efficiency. Topics of interest include, but are not limited to, additive manufacturing with welding, advanced welding processes (e.g., spot, laser, electron beam, and friction stir welding), hybrid welding systems, multi-material joining, automation and robotics in welding, green and sustainable welding, sensor integration and real-time monitoring, artificial intelligence and machine learning for process optimization, in depth microstructural characterization, advanced materials joining, and the development of sustainable and energy-efficient welding solutions.

About the Journal

Message from the Editor-in-Chief

Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided. There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Editor-in-Chief

Prof. Dr. Antonio J. Marques Cardoso
CISE - Electromechatronic Systems Research Centre, University of
Beira Interior, Calçada Fonte do Lameiro, P-6201-001 Covilhã, Portugal

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Mechanical) / CiteScore - Q1
(Control and Optimization)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.9 days after submission; acceptance to publication is undertaken in 2.4 days (median values for papers published in this journal in the first half of 2025).
