

Special Issue

10th Anniversary of *Machines*— Feature Papers in Mechatronic and Intelligent Machines

Message from the Guest Editors

It is our great pleasure to announce this Special Issue to celebrate the 10th anniversary of *Machines*. This Special Issue aims to present and circulate recent developments and achievements in mechatronics technologies, which have become essential for developing devices/machines to support human life in our modern society. Related applications include assistive devices for the elderly and disabled, cooperative devices for factory workers, and automation in unstructured environments such as construction fields and farms. This Special Issue invites paper submissions on emerging research and technologies related to mechatronic and intelligent machines (design, control, materials, optimization, diagnosis). Papers are particularly welcome on topics related to theory, design, practice, and applications, including but not limited to the following:

- Mechatronic devices and applications
- Instrumentation and measurements
- Industrial design
- Intelligent mechatronic control
- Design of intelligent machines

About the Journal

Message from the Editor-in-Chief

Machines is an international, peer reviewed journal on machinery and engineering. It publishes research articles, reviews and communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the length of the papers. Full experimental and/or methodical details must be provided. There are, in addition, unique features of this journal: Manuscripts regarding research proposals and research ideas will be particularly welcomed; Electronic files or software regarding the full details of the calculation and experimental procedure - if unable to be published in a normal way can be deposited as supplementary material.

Editor-in-Chief

Prof. Dr. Antonio J. Marques Cardoso
CISE - Electromechatronic Systems Research Centre, University of
Beira Interior, Calçada Fonte do Lameiro, P-6201-001 Covilhã, Portugal

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Mechanical) / CiteScore - Q1
(Control and Optimization)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.7 days (median values for papers published in this journal in the second half of 2025).
