

magnetochemistry

Dear Colleagues,

As Editor-in-Chief of *Magnetochemistry*, I am pleased to announce the winner of the *Magnetochemistry* Travel Award for 2018.

The award has been granted to: **Dr. Fabrizio Ortu**, a postdoctoral researcher in the group of David Mills at The University of Manchester, Manchester, UK.

Dr. Fabrizio Ortu's research focuses on the study of f-element organometallic chemistry, with a particular interest in the design and synthesis of highly axial lanthanide Single Molecule Magnets (SMMs). His current work focuses on the effect of isotopic enrichment on the relaxation of magnetization in a family of high performing dysprosium SMMs. Dr. Ortu will present the latest results of this work at ICC2018 in Sendai, Japan.

It was a difficult decision with such high quality applications for the awards and we would like to thank all applicants for submitting their diverse and fascinating range of research topics. We congratulate Dr. Ortu for his accomplishments.

Editor-in-Chief
Prof. Dr. Carlos J. Gómez García

2018 TRAVEL AWARD WINNER

Magnetochemistry (ISSN 2312-7481) is a scientific, peer-reviewed, open access journal on molecular magnetism, the relationship between chemical structure and magnetism, and magnetic materials, published quarterly online by MDPI, Switzerland.

The competition for 2019 *Magnetochemistry* Travel Awards will be open for applications in early June. Please check <http://www.mdpi.com/journal/magnetochemistry> for more information closer to this date.
