

Special Issue

Magnetic Nano- and Microparticles in Biotechnology

Message from the Guest Editors

This Special Issue of *Magnetochemistry*, entitled "Magnetic Nano- and Microparticles in Biotechnology", aims to explore recent advances in the development and application of magnetic nanoparticles and microparticles in biotechnology, including drug delivery, biomolecular separation and purification, magnetic imaging and therapy. Due to the growing importance of these materials in biomedical and environmental applications, this Special Issue seeks to compile innovative and high-impact contributions in the field. Experimental and theoretical studies, comprehensive reviews, and original research articles are welcome. The submission deadline is 30 December 2025. The first authors invited may receive a discount on the publication fees as part of the invitation program. For further information and more details regarding manuscript submission, please visit the *Magnetochemistry* website. We look forward to receiving your contributions!

About the Journal

Message from the Editor-in-Chief

Magnetochimistry constitutes a multidisciplinary field where chemists and physicists not only study magnetic properties but also design and synthesize chemical compounds with desired magnetic properties.

Magnetochimistry is inviting contributions in any field related with this area, such as theoretical models, crystal engineering, molecular magnetism, SMM, SIM, SCM, SCO, magnetic nanostructures, magnetic MOFs, magnetic recording, qubits, magneto-caloric materials, etc. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

Editor-in-Chief

Prof. Dr. Carlos J. Gómez García

Department of Inorganic Chemistry, Faculty of Chemistry, University of Valencia, C/Dr. Moliner 50, 46100 Burjassot, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Inorganic and Nuclear) / CiteScore - Q2 (Electronic, Optical and Magnetic Materials)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.9 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
