

Special Issue

Molecular Magnetic Materials

Message from the Guest Editor

The field of magnetic materials is a perennial subject of interest, having undergone a vigorous expansion from classical bulk magnets such as metal oxides to molecular magnetic materials. In recent decades, molecular magnetic materials have attracted enormous attention due to their potential applications, such as information storage, information processing, molecular spintronics, etc. Until now, concerted researcher efforts involving theoretical calculations, testing methods and synthesis, cornered the market in this field. This Special Issue intends to provide the latest updates and aid in the further development of molecular magnetic materials. We invite the authors to provide original research and review articles involving single-molecule magnets (SMMs), single-chain magnets (SCMs), magnetic MOFs, etc.

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Carlos J. Gómez García

Department of Inorganic Chemistry, Faculty of Chemistry, University of Valencia, C/Dr. Moliner 50, 46100 Burjassot, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Inorganic and Nuclear) / CiteScore - Q2 (Electronic, Optical and Magnetic Materials)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
