

## Special Issue

# Application of Magnetic Fields and Magnetic Materials to Wastewater Treatment

### Message from the Guest Editors

In recent years, diverse approaches have been applied to improving biological wastewater treatment processes. Among them, the magnetic field, a sustainable, green, and low-cost method, has attracted significant attention for its ability to enhance these processes. However, due to the complexity of magnetic fields' impacts, more efforts should be devoted to this topic. This Special Issue aims to publish a collection of ground-breaking research detailing the latest achievements in this field. We are particularly interested in original research articles considering one of the topics listed below:

- Magnetic fields' impacts on the nature of wastewater;
- Microorganisms' intracellular metabolism;
- Intracellular electron transport;
- Magnetic fields' influence on biological wastewater treatment processes;
- Other relevant subjects.

## About the Journal

### Message from the Editor-in-Chief

---

#### Editor-in-Chief

Prof. Dr. Carlos J. Gómez García

Department of Inorganic Chemistry, Faculty of Chemistry, University of Valencia, C/Dr. Moliner 50, 46100 Burjassot, Spain

---

#### Author Benefits

##### High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPus / SciFinder, and other databases.

##### Journal Rank:

JCR - Q2 (Chemistry, Inorganic and Nuclear) / CiteScore - Q2 (Electronic, Optical and Magnetic Materials)

##### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
