

Special Issue

New Trends in Molecular Magnets and Ferromagnets

Message from the Guest Editors

This issue focuses on new trends in molecular magnetism. We define this term with a broad understanding which includes both traditional single-molecular and/or single-ion magnets and organic and metal-organic ferro-, ferri-, and antiferromagnets with a long-range magnetic order. The works to be considered are not limited to the short list of topics mentioned above. Original new articles describing the role of structural defects, with unusual results on the effect of moisture on ferromagnetism and sensory properties of molecular magnets, etc. are also of significant interest for this issue.

Guest Editors

Prof. Dr. Roman B. Morgunov

Prof. Dr. Andrew Palii

Dr. Oksana Koplak

Deadline for manuscript submissions

closed (31 March 2022)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Carlos J. Gómez García

Department of Inorganic Chemistry, Faculty of Chemistry, University of Valencia, C/Dr. Moliner 50, 46100 Burjassot, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Inorganic and Nuclear) / CiteScore - Q2 (Electronic, Optical and Magnetic Materials)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
