

Special Issue

Recent Developments in Biomagnetism/Magneto-Biology

Message from the Guest Editor

Biomagnetism, a subset of bio-electromagnetism, refers to the magnetic phenomena produced by the living organisms. In recent years, this field has attracted significant interest due to the possibility of providing new ways of detecting and treating diseases differently from traditional treatments carried out using magnets. This Special Issue will highlight the most recent advances in the development of bio magnetics or magnetic-biology. Topics include but are not limited to the following: automated image-guided transcranial magnetic stimulation, bioelectric phenomena, electrophysiological recordings, bioelectrochemistry, human magnetism, magnetocardiography, magnetoception – sensing of magnetic fields by organisms, magneto-electrochemistry, magnetoencephalography, magneto-gastrography, magnetomyography, etc.

Guest Editor

Dr. Conrad Rizal

Seed NanoTech International Inc., Brampton, ON, Canada

Deadline for manuscript submissions

closed (28 February 2021)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Carlos J. Gómez García

Department of Inorganic Chemistry, Faculty of Chemistry, University of Valencia, C/Dr. Moliner 50, 46100 Burjassot, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Inorganic and Nuclear) / CiteScore - Q2 (Electronic, Optical and Magnetic Materials)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
