

Special Issue

Electromagnetics

Message from the Guest Editors

This Special Issue is devoted to the study of the interaction of electromagnetic radiation with materials containing ferro- and ferrimagnets and the use of these materials for the purpose of protection from exposure to electromagnetic radiation of the radio frequency range. The following main topics are proposed as part of this Special Issue:

1. Physical effects of the interaction of electromagnetic radiation of the radio frequency range with magnetic composites.
2. Chemical technology for the creation of radio-absorbing materials based on ferro- and ferrimagnets.
3. Laboratory methods for measuring the transmission and reflection coefficients of an electromagnetic wave by magnetic composites.
4. Analysis of the structure and chemical composition of magnetic composites.
5. Modeling of magnetic composites.
6. Other aspects of the development and creation of magnetic composites for electromagnetic safety.

Guest Editors

Dr. Kamil Gareev

Department of Micro and Nanoelectronics, Saint Petersburg Electrotechnical University "LETI", 197022 Saint Petersburg, Russia

Prof. Dr. Erkki Lähderanta

Lappeenranta University of Technology

Prof. Dr. Vladimir Pankov

Belarusian State University

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Carlos J. Gómez García

Department of Inorganic Chemistry, Faculty of Chemistry, University of Valencia, C/Dr. Moliner 50, 46100 Burjassot, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Inorganic and Nuclear) / CiteScore - Q2 (Electronic, Optical and Magnetic Materials)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
