

Special Issue

Magnetic Particles in Environmental Applications

Message from the Guest Editor

This Special Issue is conceived as a review of achievements in the use of magnetic particles in environmental research. Possible applications of magnetic particles include the development of composite materials containing magnetic particles, the use of magnetic particles to collect spilled oil products, the production of composite materials with properties of protection against electromagnetic radiation, and many others. I would especially like to note the opportunities for functionalization of materials containing magnetic particles in order to combine applications in various areas of production. Keywords:

- magnetic particles
- ferromagnetic
- environment
- composites
- functional materials

Guest Editor

Dr. Vjaceslavs Lapkovskis

Faculty of Civil and Mechanical Engineering, Riga Technical University, LV-1048 Riga, Latvia

Deadline for manuscript submissions

closed (15 July 2021)

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Carlos J. Gómez García

Department of Inorganic Chemistry, Faculty of Chemistry, University of Valencia, C/Dr. Moliner 50, 46100 Burjassot, Spain

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Chemistry, Inorganic and Nuclear) / CiteScore - Q2 (Electronic, Optical and Magnetic Materials)

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 16 days after submission; acceptance to publication is undertaken in 2.9 days (median values for papers published in this journal in the first half of 2025).
