an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Alejandro M. Mayer

Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. Marine Drugs is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

Author Benefits

-  **Open Access** Unlimited and free access for readers
-  **No Copyright Constraints** Retain copyright of your work and free use of your article
-  **Thorough Peer-Review**
-  **Rapid Processing and Immediate Publication upon Acceptance**
-  **Coverage by Leading Indexing Services** SCIE-Science Citation Index Expanded (Clarivate Analytics), INSPEC (IET), Scopus (Elsevier)
-  **No Space Constraints, No Extra Space or Color Charges** No restriction on the length of the papers, number of figures or colors
-  **Discounts on Article Processing Charges (APC)** If you belong to an institute that participates with the MDPI Institutional Open Access Program (IOAP)
-  **Impact Factor 3.503** (2016 Journal Citation Reports®)

Aims and Scope

Marine Drugs (ISSN 1660-3397) is the leading open access journal on the research, development, and production of drugs from the sea, including marine natural product chemistry. Our aim is to publish high impact articles and to serve as an active forum for the discovery of marine drugs or therapeutic marine natural products. The journal publishes reviews, regular research papers, communications and short notes. We would like to publish as much experimental detail as possible, particularly synthetic procedures and characterization information for bioactive compounds. There is, therefore, no restriction on the length of published papers.

Isolation, structure elucidation and biological activity of marine natural products

Medicinal chemistry of marine natural products

Synthesis and mutasynthesis of marine natural products

Pharmacology of marine natural products

Marine biotechnology, microbiology or biomedical engineering of marine natural products

Molecular biology and proteomics of marine natural products

Marine glycobiology and glycochemistry

Clinical trials of marine natural products

Biomedical materials derived from marine natural products

Marine drug development
