closed (30 June 2023)

Message from the Guest Editor

Dear Colleagues,

The search for bioactive compounds from algae remains an important and active area of research in the drug discovery field. This Special Issue of *Marine Drugs* invites contributions on the study of algae and will focus on highlighting new bioassays, testing, and profiling approaches to discover potential therapeutic leads. In addition, this Special Issue invites reviews and original contributions.

I look forward to receiving your contributions.

Dr. Sylvia Urban

Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. *Marine Drugs* is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [MEDLINE](#), [PMC](#), [Embase](#), [PubAg](#), [MarinLit](#), [AGRIS](#), and [other databases](#).

Journal Rank: JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmacology, Toxicology and Pharmaceutics (miscellaneous))
