# Advancements in Purification, Isolation and Chemical Profiling to Expedite the Discovery of Marine Natural Products

### Message from the Guest Editor

In the continuing quest to expedite the discovery of bioactive new marine natural products, there is, more than ever, a need to adopt efficient chemical profiling strategies. In this Special Issue of *Marine Drugs*, you are invited to submit articles that describe advances in purification, isolation and chemical profiling strategies that have led to the discovery of unprecedented bioactive marine natural products.

## About the Journal

### Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. *Marine Drugs* is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.
