

Special Issue

Marine Brown Algae-Derived Bioactive Polysaccharide Fucoidans

Message from the Guest Editor

In this Special Issue, we will focus on the applications of bioactivity of marine brown algae-derived fucoidan in the development of specific medical, cosmetic, nutraceutical, and biotechnological products. In addition, fucoidan in human clinical trials of certain diseases will be discussed. As , I invite scientists and experts in this interdisciplinary area of marine brown algae-derived fucoidan to contribute their latest research findings and review articles in the form of high-quality manuscripts. I am sure that your great efforts will lead to significant progress in this highly promising fucoidan-related research area.

Guest Editor

Prof. Dr. Hsien-Yeh Hsu

About the Journal

Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. *Marine Drugs* is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

Editor-in-Chief

Prof. Dr. Bill J. Baker

Department of Chemistry, University of South Florida, 4202 E. Fowler Ave., CHE 205, Tampa, FL 33620-5250, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmacology, Toxicology and Pharmaceutics (miscellaneous))
