

Special Issue

Marine Microalgal Functional Foods

Message from the Guest Editors

Microalgae, especially marine microalgae, are rich resources of bioactive compounds and functional foods, many of which are of high value. However, the applications in these areas are still limited because of the poor understanding of microalgal characteristics, mass cultivation technologies, and the bioactivities and functionalities of microalgal products. In this issue, we will focus on the development of marine microalgal functional foods. Experts in this interdisciplinary area of microalgal research and applications will be invited to contribute results of recent advances of their research. I am sure that this effort will lead to significant progress in this highly promising research area.

About the Journal

Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. *Marine Drugs* is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

Editor-in-Chief

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmacology, Toxicology and Pharmaceutics (miscellaneous))
