Metabolomic Study of Marine Streptomyces

Message from the Guest Editor

In recent years, the exploration of secondary metabolites produced by marine microorganisms, particularly *streptomyces* strains, has garnered significant attention within the scientific community. These versatile microorganisms have demonstrated immense potential in the synthesis of bioactive compounds with diverse applications. *Streptomyces*, known for their prolific secondary metabolite production, hold promise as sources of novel pharmaceutical agents, industrial enzymes, and biotechnological innovations. The scope of this Special Issue is multifaceted and delves into various aspects of the metabolomic study of marine *streptomyces*.

About the Journal

Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. *Marine Drugs* is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

Editor-in-Chief

Prof. Dr. Bill J. Baker

Department of Chemistry, University of South Florida, 4202 E. Fowler Ave., CHE 205, Tampa, FL 33620-5250, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmacology, Toxicology and Pharmaceutics (miscellaneous))
