

Topical Collection

Papers from “Sino–Italian Symposium on Bioactive Natural Products”

Message from the Collection Editors

With the foundation of a thousand-year-old tradition, China and Italy are recognized leaders in the research fields of natural product chemistry, natural product synthesis/biosynthesis, and in the discovery of innovative medicines from natural sources. The Sino–Italian Symposium on Bioactive Natural Products (SISBNP) is held annually in, alternately, China and Italy. The aim of such academic events is to share advanced ideas in the field of natural product sciences and to appreciate the relevant breakthroughs that may promote the development of drug discovery chemistry with indispensable significance for human survival. This *Marine Drugs* Collection will provide a platform for the symposium attendees to publish papers with a particular focus on natural products isolated from marine invertebrates and marine microorganisms, potentially useful as biological tools or as lead compounds for the development of new drugs. All submissions will be evaluated by the Editor-in-Chief or an appropriate Editorial Board Member and go through strict peer-review before publication.

About the Journal

Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. *Marine Drugs* is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

Editor-in-Chief

Ave., CHE 205, Tampa, FL 33620-5250, USA

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, MarinLit, AGRIS, and other databases.

Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmacology, Toxicology and Pharmaceutics (miscellaneous))
