

## Special Issue

# Marine Products with Skin Whitening and Sun-Screening Applications

### Message from the Guest Editor

Natural products could be secondary metabolites or derivatives from organisms including marine and non-organisms. Marine natural products containing active ingredients play a main regulatory role in numerous biological fields, such as anti-oxidation, anti-inflammation, anti-aging etc. Currently, incorporated marine products in skin beauty products are increasing use for skin care and beauty, with functions such as cosmeceuticals, nutricosmetics, skin photoprotection, sunscreen, skin-whitening, skin-lightening, skin-depigmentation, anti-wrinkle, anti-acne, skin hydrating as well anti-oxidant and anti-ageing reagents. This Special Issue mostly focuses on such marine-derived natural products and their analogs that have shown physiological or pharmacological activity in skin-whitening and sunscreen applications. The main focus of this Special Issue is on the bioactivities of the marine active components, their mechanistic mode of action and their potential use or perspectives in skin health. We aim to publish original research articles and review articles in this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

During the past few decades there has been an ever increasing number of novel compounds discovered in the marine environment. This is exemplified by the robust preclinical and clinical pipeline that currently exists for marine natural products. *Marine Drugs* is inviting contributions on new advances in marine biotechnology, pharmacology, chemical ecology, synthetic biology, and genomics approaches related to the discovery of therapeutically relevant marine natural products. Our goal is to share your contribution in a timely fashion and in a manner that will be valued by the scientific community.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, PubAg, MarinLit, AGRIS, and other databases.

#### Journal Rank:

JCR - Q1 (Pharmacology and Pharmacy) / CiteScore - Q1 (Pharmacology, Toxicology and Pharmaceutics (miscellaneous))
