### Message from the Guest Editor

Dear Colleagues,

In the past decade, researchers have been actively looking for alternative 2D materials to overcome the difficulties related to the absence of a bandgap in graphene. Transition metal dichalcogenides (TMDCs), with a structure in the form of X–M–X, where M is a transition metal element from groups 4–7 and 10, while X is a chalcogen (S, Se, Te), have promptly emerged as promising materials.

The aim of this Special Issue is to provide a platform for both experimental and theoretical studies on the fundamentals and applications of 2D transition metal dichalcogenides.

Topics of interest to this special issue include, but are not limited to:

- Transition metal dichalcogenide
- Synthesis: Exfoliation, chemical vapor deposition, molecular beam epitaxy
- Structure ; Transport properties ; Radiation effect
- Mobility engineering ; Mechanical properties ; Strain engineering
- Electronic bandstructure: Bandgap, spin–orbit, and spin–valley coupling
- Semiconductor devices: Heterostructures, transistors, photodetectors, memories, high-frequency applications
- Optical properties: Emission, absorption, excitons

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-four topics: biomaterials, energy materials, advanced composites, structure analysis and characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its readership.

## Author Benefits

**Open Access:**— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Ei Compendex](#), [CaPlus / SciFinder](#), [Inspecc](#), [Astrophysics Data System](#), and other databases.

**Journal Rank:** [JCR - Q1](#) (*Metallurgy & Metallurgical Engineering*) / [CiteScore - Q2](#) (*Condensed Matter Physics*)
