### Message from the Guest Editor

This Special Issue aims to collect full papers and reviews related to the latest achievements in the field of materials science and technology. All scholars working in this field are welcome to submit their reports to this Special Issue as well as to participate with oral, poster, or virtual presentations at the 8th Asian Symposium on Advanced Materials (ASAM-8) to be held on July 3 – 7, 2023 in Novosibirsk, Russia (<http://conf.nsc.ru/asam8/en>). Since 2007, the Symposium has been held regularly and attracts a large number of participants from a wide range of Asian countries. The success of the Symposium is thanks to the increasing interest of the scientific community in the science of materials, as well as in the practical application of advanced materials in different areas. The Symposium traditionally attracts specialists in the field of fundamental science of materials, energy, ecology and environmental science, engineering, and biomedicine, among others.
