Design and Characterization of Energy Catalytic Materials

Guest Editors:

Prof. Dr. Gang Cheng
School of Chemistry and Environmental Engineering, Wuhan Institute of Technology, Donghu New & High Technology Development Zone, Wuhan 430205, China

Dr. Chao Han
School of Materials Sciences and Engineering, Central South University, Changsha 410083, China

Prof. Dr. Florian J. Stadler
Department of Materials Science and Engineering, Shenzhen University, Shenzhen 518055, China

Deadline for manuscript submissions:
closed (20 April 2024)

Message from the Guest Editors

The rapid growth of global energy demand has greatly promoted the utilization of various energy systems and the development and transformation of energy catalytic materials. Photocatalysis, electrochemical catalysis, thermal catalysis, and photo–electrochemical/thermal coupled catalysis systems offer potential routes to address the increasing environmental and energy-related issues. The Special Issue, Design and Characterization of Energy Catalytic Materials, will include a comprehensive overview and in-depth research paper addressing recent progress in energy catalysis. Studies of advanced characterization techniques and design methods in this field are highly encouraged.

Potential topics include, but are not limited to:

- Photocatalysis;
- Electrochemical catalysis;
- Photo-electrochemical/Photo-thermal catalysis;
- Carbon dioxide reduction;
- Hydrogen evolution;
- Nitrogen reduction;
- Fuel cells;
- Hydrogen peroxide production;
- Pollutants removal;
- Biomass conversion;
- Thermodynamics;
- In situ techniques;
- Fabrication methodology.

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.
Journal Rank: JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
