## Advances in Porous Materials: Synthesis, Characterisations and Applications (2nd Edition)

Guest Editors:

**Dr. Weiqing Zhang**

Guangxi Medical University  
Cancer Hospital, Nanning  
530021, China

**Prof. Dr. Zhifeng Wang**

School of Materials Science and  
Engineering, Hebei University of  
Technology, Tianjin 300401,  
China

**Dr. Yichao Wang**

School of Engineering, Design  
and Built Environment, Western  
Sydney University, Penrith, NSW  
2751, Australia

Deadline for manuscript  
submissions:

**20 October 2024**

### Message from the Guest Editors

Porous materials have shown great potential in catalysis, biosensor and biomedical, energy storage and conversion, aerospace, and architecture applications owing to their high surface area, low density, and high specific strength. Porous materials have the structural feature of continuous interconnected porosity, which benefits the transport of electrons, ions, and mass. The chemical compositions of porous materials are well-controlled and diversified and include metals, ceramics, and carbon-based materials. As a result, the development of porous materials is quickly becoming important. An increasing number of researchers are working from different perspectives to conduct fundamental research on various applications.

This Special Issue focuses on recent advances in various porous materials. Research areas include but are not limited to novel synthetic strategies, advanced characterization skills, theoretical calculation methods, and various applications. We encourage you to submit a manuscript to this Special Issue. Original research papers and review articles are welcome. We look forward to receiving your contributions.

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
