Deadline for manuscript submissions:
15 December 2020

Message from the Guest Editor

It is my pleasure to invite you to publish your metallic foam-related research works in the Special Issue, ‘Advanced and High-Performance Metallic Foams’, of Materials as a full paper, short communication, or review. This Special Issue covers all types and aspects of metallic foams from design through production and intensive testing, including, but not limited to liquid- and solid-state and 3D additive production methods, blowing agents, foaming, macro-, meso-, and microstructures of foams, structural reverse engineering, modelling of metallic foams, quasi-static, dynamic and cyclic mechanical properties (compressive, tensile, and bending behavior, including blast protection and piercing) at room, elevated, or cryogenic temperature, mechanical damping, failure mechanisms and energy absorption of metallic foams, foam-filled structures and their mechanical stability, biocompatible foams, degradable and recyclable metallic foams, joining technologies (brazing, welding, gluing, etc.), forming of metallic foams, notch and hole sensitivity, applications and case studies.

Professor of Biomedical Engineering, Professor of Bioengineering, Professor of Experimental Surgery, Associate Dean—Research and Graduate Studies, Department of Biomedical Engineering, Faculty of Medicine/Faculty of Dentistry, Duff Medical Science Building, Room 313, 3775 University Street, Montreal, QC, H3A 2B4, Canada

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers fourteen comprehensive topics: Biomaterials; Energy Materials; Composites; Structure Analysis; Porous Materials; Manufacturing Processes; Advanced Nanomaterials; Smart Materials; Thin Films; Catalytic Materials; Carbon Materials; Materials Chemistry; Materials Physics; Optics and Photonics; Corrosion; Building Materials. The distinguished and dedicated editorial board and our strict peer-review process ensure the highest degree of scientific rigor and review of all published articles.

Materials provides an unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), EI Compendex and other databases. For more info on the journal’s Impact Factor, see here. Citations to become available in PubMed soon, full-text archived in PubMed Central.

Rapid publication: manuscripts are peer-reviewed; a first decision is provided to authors approximately 14.2 days after submission; acceptance to publication in 5 days (median values for papers published in Materials in the second half of 2018).
