Deadline for manuscript
submissions:

31 December 2020

Message from the Guest Editor

Biomaterials, engineered substances that interact with biological systems with applications in medicine. This Special Issue focuses on recent progress and novel trends in (bio)material science. Special attention will be devoted to biomaterials with advanced functions and unique properties applicable in medicine and biology but also as tools for research.

This Special Issue “Advanced Functional Materials for Biomedical Applications” will underline the most recent discoveries and progress in all fields of science related to advanced materials with possible applications in medicine and biology. This Special Issue will focus particularly on, but not be limited to, cell culture, tissue engineering, drug delivery, antimicrobial activity, material characterization, bioimaging, and bioactivity. Reviews, regular research articles, and short communications on this topic are invited from research groups from all over the world to encourage the dissemination of scientific knowledge through this open-access journal. Researchers working in the field of biomaterials and related disciplines are encouraged to publish their recent findings in this Special Issue of *Materials*.

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers fourteen comprehensive topics: Biomaterials; Energy Materials; Composites; Structure Analysis; Porous Materials; Manufacturing Processes; Advanced Nanomaterials; Smart Materials; Thin Films; Catalytic Materials; Carbon Materials; Materials Chemistry; Materials Physics; Optics and Photonics; Corrosion; Building Materials. The distinguished and dedicated editorial board and our strict peer-review process ensure the highest degree of scientific rigor and review of all published articles.

Materials provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access:—free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed by the [Science Citation Index Expanded](#) (Web of Science), [Ei Compendex](#) and [other databases](#). Citations available in [PubMed](#), full-text archived in [PubMed Central](#).

CiteScore (2019 Scopus data): **3.5**, which equals rank 173/460 in 'General Materials Science'.
