Optoelectronic Semiconductor Materials and Devices

Guest Editor:

Dr. Mingjie Li

Department of Applied Physics,
Hong Kong Polytechnic
University, Hong Kong, China

Deadline for manuscript
submissions:

20 July 2024

Message from the Guest Editor

Optoelectronic semiconductor materials possess unique properties that allow them to manipulate and control light-matter interactions, making them essential for the development of various optoelectronic devices. These materials find applications in areas such as photonics, solar cells, light-emitting diodes, sensors, and optical communications. Understanding the fundamental properties, fabrication techniques, and performance optimization of these materials is vital for unlocking their full potential and driving further advancements in optoelectronics.

This Special Issue welcomes contributions on a wide range of topics related to optoelectronic semiconductor materials and devices. We invite researchers, scientists, and engineers from around the world to submit their original research papers, reviews, or perspective articles to this Special Issue. By sharing your insights and findings, you will contribute to the collective knowledge and advancement of optoelectronic semiconductor materials and devices.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
