## Environmentally-Induced Failures of Electronic Grade Alloys and Coatings

Guest Editor:

**Prof. Dr. Balázs Illés**

Department of Electronics  
Technology, Budapest University  
of Technology and Economics,  
Budapest, Hungary

Deadline for manuscript  
submissions:

**closed (31 December 2020)**

### Message from the Guest Editor

Electronic-grade alloys are used in numerous electronic devices and systems. Electronic systems are becoming more important in our everyday lives. Consequently, electronic-grade alloys should exhibit excellent mechanical, electrical, thermal, and reliability properties. This initiates the continuous development and preparation of new alloys via the use of novel techniques.

In many fields, electronic devices need to operate in harsh environments, so not only the quality but the long-term reliability of the applied alloys is also critical. There is a strong need to investigate the environmentally induced failure mechanisms in these alloys.

This Special Issue is dedicated to disseminating the recent advancements and latest results in this rapidly evolving interdisciplinary research field.

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
