### Message from the Guest Editors

Friction is one of the main sources of energy dissipation between the contact surfaces and the dissipation of energy is the main cause of wear. Although the tribology in the broadest sense has studied for so long all the facets of this complex subject have not yet been thoroughly examined and research in this field is going on all over the world.

Materials is providing a Special Issue that is intended to be a means for researchers and engineers of different disciplines to publish and exchange the latest results of their research. This Special Issue will focus on progress in understanding both the fundamental and applied aspects of wear and friction of materials. With the aim of highlighting this concept, this special issue will focus on the following topics:

Wear: Theory, Modeling and Simulation.

Wear: Testing and Monitoring.

Friction and Wear under Vibratory Contact.

Engine Tribology and wear at high temperature.

Wear of Coatings.

Wear of Tools.

Tribocorrosion.

Role of Third Bodies during Wear.

We warmly invite you to submit a manuscript(s) for this Special Issue. Full papers, communications, and reviews are all welcome.

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
