## Homogeneous and Heterogeneous Catalysis: Principles, Materials Properties and Applications

Guest Editor:

**Prof. Dr. Yuwen Chen**

Department of Chemical and  
Materials Engineering, National  
Central University, Jhongli 32001,  
Taiwan

Deadline for manuscript  
submissions:

**closed (20 December 2022)**

### Message from the Guest Editor

Catalytic materials are those solids that allow the chemical reaction to take place efficiently and cost-effectively. They exist in many forms and can be prepared through various techniques involving different procedures and methods. New developments based on the design and functioning of catalytic materials are key to solving a number of current challenges, including the development of cleaner fuel technologies and the elimination of environmentally damaging processes in the pharmaceutical or chemical industries. This Special Issue will collect high-quality comprehensive papers and review papers covering mainly fundamental and applied research/results in the field of homogeneous and heterogeneous catalysis. Topics to be covered include but are not limited to homogeneous catalysis, metal catalysis, heterogeneous catalysis, solid acid, solid base, zeolite, mesoporous material, supported metal catalysts, and photocatalysis. We warmly encourage colleagues involved in all branches of catalytic materials to contribute to this Special Issue.

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
