Interface Engineering in Organic/Inorganic Hybrid Solar Cells

Message from the Guest Editors

In this context, the main aim of this Special Issue on “Interface Engineering in Dye Sensitized and Perovskite Solar Cells” is to provide the current state-of-the-art in terms of theory, processing, and applications of interface engineering approach to boost DSC and PSC efficiency, their stability and to permit an effective scaling up to module size. This issue will present a detailed overview of methodologies for interface engineering in DSCs and PSCs, their characterization and application, identifying, at the same time, future research directions and developments.

Keywords

- Hybrid Organic/inorganic Solar Cells
- Perovskite Solar Cells and Modules
- Dye Sensitized Solar Cell and Modules
- Interface Engineering and 2D Materials
- Device Interface aging and long-term Stability
**Editor-in-Chief**

**Prof. Dr. Maryam Tabrizian**  
James McGill Professor, Professor of Biomedical Engineering, Professor of Bioengineering, Professor of Experimental Surgery, Department of Biomedical Engineering, Faculty of Medicine/Faculty of Dentistry, Duff Medical Science Building, 3775 University Street, Montreal, QC, H3A 2B4, Canada

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers fourteen comprehensive topics: Biomaterials; Energy Materials; Composites; Structure Analysis; Porous Materials; Manufacturing Processes; Advanced Nanomaterials; Smart Materials; Thin Films; Catalytic Materials; Carbon Materials; Materials Chemistry; Materials Physics; Optics and Photonics; Corrosion; Building Materials. The distinguished and dedicated editorial board and our strict peer-review process ensure the highest degree of scientific rigor and review of all published articles.

*Materials* provides an unique opportunity to contribute high quality articles and to take advantage of its large readership.

**Author Benefits**

**Open Access:** — free for readers, with article processing charges (APC) paid by authors or their institutions.  
**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, PubMed, PMC, CaPlus / SciFinder, Inspec, Astrophysics Data System, and many other databases.  
**Journal Rank:** JCR - Q2 (*Materials Science, Multidisciplinary*) / CiteScore - Q2 (*General Materials Science*)
