Message from the Guest Editors

The Special Issue, “*Mechanical Behavior, Leaching and Environmental Evaluation of Recycled Aggregates*”, will address advances in materials science by the study of revalorization and recycling systems for construction and industrial wastes, and the evaluation of the physical, chemical and mechanical properties of recycled aggregates and their environmental assessment

Original papers are solicited on the study of Mechanical and Physical Behavior, Leaching and Environmental Evaluation of Recycled Aggregates. Of particular interest are recent developments in advanced recycled materials, the characterization of wastes and the mechanical and environmental behavior of these recycled aggregates for use in civil engineering and construction infrastructure. Articles and reviews dealing with the assessment of recycled aggregates used as un-bound or bound material for road construction or asphalt pavement, aggregate for concrete manufacturing, or aggregates from construction debris that are reused in other building projects are very welcome.

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty comprehensive topics: biomaterials, energy materials, advanced composites, structure analysis and characterization, porous materials, manufacturing processes and systems, advanced nanomaterials, smart materials, thin films and interfaces, catalytic materials and carbon materials, materials chemistry, materials physics, optics and photonics, corrosion and materials degradation, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics, metals and alloys, general. The distinguished and dedicated editorial board and our strict peer-review process ensure the highest degree of scientific rigor and review of all published articles. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Ei Compindex](#), [CaPlus / SciFinder](#), [Inspec](#), [Astrophysics Data System](#), and many other databases.

Journal Rank: [JCR](#) - Q1 (*Metallurgy & Metallurgical Engineering*) / [CiteScore](#) - Q2 (*Condensed Matter Physics*)
