Message from the Guest Editors

Dear Colleagues,

The properties of aerogels are controlled by their solid content, high porosity, pore size distribution, pore volume and the corresponding inner surfaces of the open porous network structure. As a result, materials with low densities, good thermal and acoustic insulation behavior, high sorption capacities, tunable electrical conductivities and last but not least highly variable mechanical properties, are obtained.

In this Special Issue, we invite authors to contribute their current research results with respect to the structure and mechanical properties of aerogels. The mechanical properties of aerogels can be changed not only by process control during chemical synthesis and drying, but also by combining them with different materials. Submissions pertaining to the following topics on aerogels will be considered.

- Novel approaches to improve the structure and mechanical properties of aerogels or aerogel composites;
- Characterization of the structural, fractal or mechanical properties;
- Modeling studies describing their structure–property relationships;
- Review articles on the abovementioned topics.

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty comprehensive topics: biomaterials, energy materials, advanced composites, structure analysis and characterization, porous materials, manufacturing processes and systems, advanced nanomaterials, smart materials, thin films and interfaces, catalytic materials and carbon materials, materials chemistry, materials physics, optics and photonics, corrosion and materials degradation, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics, metals and alloys, general. The distinguished and dedicated editorial board and our strict peer-review process ensure the highest degree of scientific rigor and review of all published articles. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access:— free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Ei Compindex](#), [CaPlus / SciFinder](#), [Inspec](#), [Astrophysics Data System](#), and many other databases.

Journal Rank: [JCR - Q1 \(Metallurgy & Metallurgical Engineering\)](#) / [CiteScore - Q2 \(Condensed Matter Physics\)](#)
