Deadline for manuscript  
submissions:

**closed (20 November 2022)**

### Message from the Guest Editor

Dear Colleagues,

As one of the most popular restorative materials, composite resins have been widely used in dentistry for nearly 60 years. Ongoing enhancements of these materials have extended their indications for use and contributed to excellent clinical results in terms of aesthetics and function. In fact, contemporary restorative dentistry is unimaginable without composite resins. However, it is clear from the literature that there are still limitations in contemporary dental composite resins, and there is therefore a need to further improve the property of materials to reduce the clinical failure rates and increase durability of direct/indirect composite restorations.

Based on these, this Special Issue is intended to cover the topic of dental composite resins from the most recent research and development perspectives. It is our pleasure to invite you to contribute to this Special Issue. Research articles, review articles, and short communications are all welcome.

Assoc. Prof. Dr. Sufyan Garoushi

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
