Technology Division, Oak Ridge  
National Laboratory, ORNL, Oak  
Ridge, TN, USA

Deadline for manuscript  
submissions:

**closed (10 December 2022)**

### Message from the Guest Editor

Dear Colleagues,

The design and manufacturing of advanced materials are of great interest in many applications of automotive, aerospace, clean energy, military, and heavy industries. The addition of alloy elements and various manufacturing processes greatly influence the resulting microstructures and mechanical properties. Furthermore, microstructures and their material properties can be modified by post material processing, including shaping and forming, thermal and/or mechanical treatment, welding, and joining for the final application. In addition, residual stress after thermal and/or mechanical processing also affects mechanical performances under static or dynamic mechanical testing or in-service conditions.

This Special Issue focuses on multidisciplinary research for emerging alloy design, approaches, and theories of material processing and joining as well as advanced metallurgical characterizations and mechanical properties under static, dynamic, corrosion, high-pressure gas, or other environmental testing.

## Editors-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

### Prof. Dr. Yuguang Ma

State Key Laboratory of Luminescent Materials and Devices, South China University of Technology, Guangzhou 510640, China

## Message from the Editorial Board

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
