## Advances in Biomaterials towards Tissue Engineering

Guest Editors:

**Prof. Dr. Paweł Sajkiewicz**

Laboratory of Polymers and Biomaterials, Institute of Fundamental Technological Research, Polish Academy of Sciences, Warsaw, Poland

**Dr. Dorota Kolbuk-Konieczny**

Laboratory of Polymers and Biomaterials, Institute of Fundamental Technological Research of the Polish Academy of Sciences, 02-106 Warsaw, Poland

Deadline for manuscript submissions:

**closed (10 March 2023)**

### Message from the Guest Editors

Dear Colleagues,

There is still a fast-growing interest in the applications of biomaterials in the field of tissue engineering as well as drug delivery systems. A lot of effort has been made in recent years in the research of polymers, metals alloys, and ceramics dedicated to tissue engineering and sustained drug delivery systems. This Special Issue is focused on advances in biomaterial scaffolds formed by various techniques with potential in the aforementioned medical applications. Scaffolds' morphology and chemical and molecular structure are crucial for material–cell interactions.

Considering your prominent contributions in this fascinating area, we would like to cordially invite you to submit a paper to this Special Issue, "Advances in Biomaterials Towards Tissue Engineering". through the journal webpage. The submitted manuscripts will then be fast-tracked for review. We would very much appreciate it if you could let us know of your interest in contributing a paper at your earliest convenience. Research articles and review articles, as well as communications and letters, are welcome.

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (Metallurgy and Metallurgical Engineering) / CiteScore - Q1 (Condensed Matter Physics)
