Message from the Guest Editors

Dear Colleagues,

This Special Issue of *Materials* on "Biomaterials and Implant Biocompatibility Second Volume" will focus on recent progress in the development, material testing, and biocompatibility and bioactivity evaluation of various materials including, but not limited to, bioceramics, biopolymers, biometals, composite materials, biomimetic materials, hybrid biomaterials, and drug/device combinations for implants and prostheses with medical applications spanning from soft to hard tissue regeneration. Submitted manuscripts may cover all aspects, ranging from investigations into material characterization to in vitro and in vivo testing for the assessment of the biological performance of advanced, novel biomaterials, and implants.

We invite all colleagues to submit manuscripts (full papers, reviews, or notes) in open access to this Special Issue. We encourage you to disseminate this invitation to any colleagues who may be interested.
