Message from the Guest Editors

Dental Implant treatment represents today a safe and predictable method for managing edentulous jaw, giving patients the opportunity of having fixed prosthodontics. Long-term clinical studies have recently demonstrated how the clinical success of this kind of treatment is related to the osteointegration phases and to the oral health of the patients. Therefore, the digital solution applied to dentistry, medicine and the surgical technique is aimed at reducing patients' discomfort and having a quick and easy solution for performing surgeries. The introduction of new aesthetic materials, together with a whole range of digital devices (intraoral, extraoral, face scanners and cone beam computed tomography scans), processing software, and powerful manufacturing and prototyping tools (milling machines and 3D printers) are radically transforming the dental profession. In this vision, modern digital dentistry is changing workflows and, consequently, operating procedures.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
