submissions:

31 December 2019

Message from the Guest Editor

Dear Colleagues,

Mechanical tests followed by microstructural investigations bring valuable information for understanding the mechanical performance of materials. Electron microscopy is one of the most important techniques for analyzing deformation microstructures. Two kinds of electron microscopes bring complementary information: at the macro/meso-scale, scanning electron microscopy (SEM), and at micro/nano-scale, transmission electron microscopy (TEM).

Following the breakthroughs in materials science, the constant improvement of electron microscopy techniques tend to make them essential for bringing valuable information to understand the mechanical behavior of materials. This Special Issue aims to report some of the significant progress in the field of electron microscopy. Articles will cover major aspects of materials science: the development of revolutionary electron microscopy techniques, fundamental physical phenomena and of course their applications in materials science.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Maryam Tabrizian

Professor of Biomedical Engineering, Professor of Bioengineering, Professor of Experimental Surgery, Associate Dean—Research and Graduate Studies, Department of Biomedical Engineering, Faculty of Medicine/Faculty of Dentistry, Duff Medical Science Building, Room 313, 3775 University Street, Montreal, QC, H3A 2B4, Canada

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers fourteen comprehensive topics: Biomaterials; Energy Materials; Composites; Structure Analysis; Porous Materials; Manufacturing Processes; Advanced Nanomaterials; Smart Materials; Thin Films; Catalytic Materials; Carbon Materials; Materials Chemistry; Materials Physics; Optics and Photonics; Corrosion; Building Materials. The distinguished and dedicated editorial board and our strict peer-review process ensure the highest degree of scientific rigor and review of all published articles.

Materials provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), Ei Compendex and other databases. For more info on the journal's Impact Factor, see here. Citations to become available in PubMed soon, full-text archived in PubMed Central.

Rapid publication: manuscripts are peer-reviewed; a first decision is provided to authors approximately 14.2 days after submission; acceptance to publication in 5 days (median values for papers published in *materials* in the second half of 2018).
