Message from the Guest Editors

Dear Colleagues,

Research in the field of geopolymers and alkali-activated materials is very active and developing quickly. In the last decade, a great deal has been understood about the chemistry and the microstructure of these materials. Currently, great efforts are being made to develop standardized tests and sustainability assessment to ensure a rapid commercial-scale deployment of these types of materials. This Special issue aims to collect the most recent advances from the global research and development community regarding a deeper comprehension of the structural and microstructural characteristics and the development of standardization and applications.

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers fourteen comprehensive topics: Biomaterials; Energy Materials; Composites; Structure Analysis; Porous Materials; Manufacturing Processes; Advanced Nanomaterials; Smart Materials; Thin Films; Catalytic Materials; Carbon Materials; Materials Chemistry; Materials Physics; Optics and Photonics; Corrosion; Building Materials. The distinguished and dedicated editorial board and our strict peer-review process ensure the highest degree of scientific rigor and review of all published articles.

Materials provides an unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High visibility: indexed by the Science Citation Index Expanded (Web of Science), Ei Compendex and other databases. Citations available in PubMed, full-text archived in PubMed Central.

CiteScore (2018 Scopus data): 3.26, which equals rank 97/439 (Q1) in 'General Materials Science'.
