Deadline for manuscript  
submissions:

**closed (10 March 2022)**

### Message from the Guest Editor

Dear Colleagues,

Hydrogen storage materials have long been a matter of interest toward the application of hydrogen as an energy vector. In particular, the compact size of hydrogen stores based on hydrides and the low pressures involved in this type of storage are an attractive selling point, especially regarding safety and in regions subject to stringent regulations regarding pressure vessels, such as Japan.

The field of hydrogen storage materials is a very diverse one, and therefore, many different types of materials can be considered for application in a variety of cases—solid (as in hydrides), liquid (such as LOHCs), and gaseous (for instance,  $\text{NH}_3$ ).

I am writing to invite you to participate in a Special Issue of the journal *Materials* on “Applications, Optimization, and Comprehensive Characterization of Hydrogen Storage Materials”. This title has been selected to include both application- and characterization-oriented studies, since they complement each other. Full papers, communications, and reviews are all welcome.

Dr. José M. Bellosta von Colbe

*Guest Editor*

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
