Message from the Guest Editor

Dear Colleagues,

The design and manufacture of functional materials has been one of the key driving forces of the modern age. The properties of every device are governed by the performance of the materials that they consist of, which has led to a constant demand for innovation and improvement of fundamental and exotic materials. One key method of tackling this challenge is to look at how materials are made, and, in particular, to look at different synthetic routes to their manufacture. This, coupled with a global appetite to manufacture in a more sustainable way, utilising for example atom efficient processes or low temperature routes, has resulted in a field of study devoted to looking at different precursors for preparing materials. In this special issue entitled: Novel Precursors to Inorganic Materials, we will celebrate the efforts of the research community who are looking to revolutionise material design in this way.

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

Journal Rank: JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
