Message from the Guest Editor

We have the pleasure to invite you to submit a manuscript to the forthcoming Special Issue, “Advances in Laser Technologies and Applications”, for the journal Materials.

Since the invention of the laser, a broad variety of laser systems with different properties have been developed and have allowed the processing of almost any material. Laser has been established as the key tool for many material processing applications and is many times the only real solution available.

This Special Issue covers the whole spectrum of laser materials processing, ranging from novel trends in well-established industrial processing techniques (like laser welding or laser micro processing) to fundamental research in novel applications (like laser tissue engineering or surface functionalization). This Special Issue will cover applications with new laser systems, new beam delivering systems and new methods for the monitoring and adaptive control of laser processes. In addition, fundamental research concerning the interaction between laser radiation and matter, including simulations and the modeling of these processes will also be topics of specific interest.

Message from the Editor-in-Chief

Materials (ISSN 1996-1944) was launched in 2008. The journal covers twenty comprehensive topics: biomaterials, energy materials, advanced composites, structure analysis and characterization, porous materials, manufacturing processes and systems, advanced nanomaterials, smart materials, thin films and interfaces, catalytic materials and carbon materials, materials chemistry, materials physics, optics and photonics, corrosion and materials degradation, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics, metals and alloys, general. The distinguished and dedicated editorial board and our strict peer-review process ensure the highest degree of scientific rigor and review of all published articles. Materials provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access:— free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and many other databases.

Journal Rank: JCR - Q1 (Metallurgy & Metallurgical Engineering) / CiteScore - Q2 (Condensed Matter Physics)
