### Message from the Guest Editor

Dear Colleagues,

This Special Issue deals with all machining technologies as well as the follow measurement of parts and the evaluation of the machined surface integrity. We welcome articles focusing on conventional and unconventional machining technologies, progressive machining technologies (HSC, HFC, HPC, etc.), CAD/CAM/CAP/CIM technologies, post-processing of 3D printing manufactured parts, cutting tools, the measurement and testing of machine tools, the machinability of steels and alloys, coatings of cutting tools, the measurement of dimensional and shape accuracy of workpieces, the evaluation of all parameters of surface integrity after machining, and all other topics focusing on the machining and manufacturing of steels and alloys.

It is my pleasure to invite you to submit a manuscript for this Special Issue. Full papers, communications, and reviews are all welcome.
