## Materials, Design and Process Development for Additive Manufacturing

Guest Editor:

**Dr. Vadim Sufiiarov**

Peter the Great St. Petersburg  
Polytechnic University, 195251,  
Polytechnicheskaya, 29, St.  
Petersburg, Russia

Deadline for manuscript  
submissions:

**closed (28 February 2022)**

### Message from the Guest Editor

This issue will cover a wide scope of additive manufacturing processes, comprising investigation, characterization of materials and their properties, development and application of new materials, structures designed for additive manufacturing. Topics of particular interest include but are not limited to:

- New biomaterials, including alloys with reduced Young modulus, and porous and biodegradable alloys;
- New material formulations and composite materials adapted specially for additive manufacturing;
- High-entropy alloys, ceramics, metal- and ceramic-matrix composites;
- Metamaterials and alloys with shape memory effect;
- Bulk metallic glasses and nanocrystalline alloys;
- Multimaterial additive manufacturing;
- Materials with graded properties such as microstructure, chemical composition, density, etc.;
- Wire, filament, and slurry based additive manufacturing;
- In situ synthesis and adjusting alloying with blending powders;
- Computer methods for designing alloys, structures, and simulation of processes.

It is my pleasure to invite you to submit a manuscript for this Special Issue. Full papers, communications, and reviews are all welcome.

# Special Issue

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q1 (Metallurgy and Metallurgical Engineering) / CiteScore - Q2 (*Condensed Matter Physics*)
