## Materials in Energy Technology

Guest Editors:

**Prof. Dr. Tadeusz Bohdal**

Faculty of Mechanical  
Engineering, Koszalin University  
of Technology, Raclawicka 15-17  
Street, 75-620 Koszalin, Poland

**Dr. Małgorzata Sikora**

Faculty of Mechanical  
Engineering, Department of  
Energy Engineering, Koszalin  
University of Technology,  
Koszalin, 75-453, Poland

Deadline for manuscript  
submissions:

**closed (10 August 2022)**

### Message from the Guest Editors

The energy sector is currently very important for the development of technology. It is a necessary field of science in any branch of technology. Both the materials used to build energy-generating devices and the materials used to obtain energy are of great importance here. The latter may include fuels, biomass, and substances used to transfer and accumulate energy, both heat and electricity. In addition to material intermediaries in energy conversion and transmission, materials from which renewable energy and conventional energy devices are built are important, not only due to their strength parameters but also their impact on the environment. Nowadays, in addition to the development of technology, the protection of the natural environment is also of great importance, which is why biodegradable materials of natural origin—those that can be recycled or have a minimal negative impact on the natural environment—are promoted.

This Special Issue is intended to cover the test results for all materials that fulfill the criteria described above.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Maryam Tabrizian

1. Department of Biomedical Engineering, Faculty of Medicine and Health Sciences, McGill University, Montreal, QC H3A 2B6, Canada

2. Faculty of Dentistry and Oral Health Sciences, McGill University, 3640 Rue University, Montreal, QC H3A 0C7, Canada

## Message from the Editor-in-Chief

*Materials* (ISSN 1996-1944) was launched in 2008. The journal covers twenty-five comprehensive topics: biomaterials, energy materials, advanced composites, advanced materials characterization, porous materials, manufacturing processes and systems, advanced nanomaterials and nanotechnology, smart materials, thin films and interfaces, catalytic materials, carbon materials, materials chemistry, materials physics, optics and photonics, corrosion, construction and building materials, materials simulation and design, electronic materials, advanced and functional ceramics and glasses, metals and alloys, soft matter, polymeric materials, quantum materials, mechanics of materials, green materials, general. *Materials* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Ei Compendex, CaPlus / SciFinder, Inspec, Astrophysics Data System, and other databases.

**Journal Rank:** JCR - Q2 (*Metallurgy & Metallurgical Engineering*) / CiteScore - Q2 (*Condensed Matter Physics*)
